

Applying Risk Based Thinking in Construction

INTRODUCTION

The course provides participants an understanding of risk-based thinking and its application in the organization. The ISO 9001, ISO 14001 and ISO 45001 standards require organizations to identify risks and opportunities for their business, operations, environmental, safety and health management, and project activities. The course provides a step-by-step guide in carrying out risk assessment for departments and projects.

Workshop practice sessions with sample risk register will be provided to guide participants during in the course. This will facilitate participants to learn and apply risk methodology when preparing a risk register.

OBJECTIVES

- Understand risk-based thinking in construction
- Learn the risk requirements in ISO 9001, ISO 14001 and ISO 45001 standards
- Apply the step-by-step risk assessment methodology and prepare a risk register
