

Implementing ISO 14001:2015 and EMS in Construction

INTRODUCTION

The course provides an understanding on ISO 14001:2015 standard and its interpretation and application in construction to protect the environment and prevent pollution. Appreciation of the new requirements in ISO 14001:2015 standard is conveyed through examples, illustrations, sharing and practice sessions. Upon attending the course, participants will have better understanding how to implement ISO 14001:2015 and environmental management system (EMS) in their organisation and projects.

Transition process, EMS documentation and implementation, auditing and certification to ISO 14001:2015 standard will be discussed during the training.
