

Implementing ISO 9001:2015 and QMS in Construction

INTRODUCTION

The course provides an understanding of ISO 9001:2015 best practice requirements and how to apply in construction, property development and engineering companies. Practice sessions on risk based thinking, context of the organization, interested parties, organizational knowledge and other new requirements will be carried out to enhance learning and understanding of these requirements.

Upon attending the course, participants will have better understanding how to implement ISO 9001:2015 and quality management system (QMS) in their organisation and projects. The course will discuss on transition process, QMS documentation, QMS implementation, auditing and certification to ISO 9001:2015 standard.

OBJECTIVES

- Understand the ISO 9001:2015 concepts and principles
- Understand and apply ISO 9001:2015 best practices in my organization
